Title: Evaluation of thiazolidinone derivatives as a new class of mushroom tyrosinase inhibitors

Authors: Mehrnaz Rezaei, Hamed Taj Mohammadi, Atiyeh Mahdavi, Mostafa Shourian, Hossein Ghafoori

PII: S0141-8130(17)32677-6
DOI: <https://doi.org/10.1016/j.ijbiomac.2017.11.147>
Reference: BIOMAC 8627

To appear in: *International Journal of Biological Macromolecules*

Received date: 22-7-2017
Revised date: 21-10-2017
Accepted date: 22-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evaluation of thiazolidinone derivatives as a new class of mushroom tyrosinase inhibitors

Co-first author:

Mehrnaz Rezaei

Hamed Taj Mohammadi

Highlights

- Thiazolidinone derivatives are low-cost and easy-to-prepare compounds that possesses noticeable biological and pharmacological properties such as anticancer, antibacterial and antioxidant potential.
