

## Accepted Manuscript

Title: Fabrication of ofloxacin imprinted polymer on the surface of magnetic carboxylated cellulose nanocrystals for highly selective adsorption of fluoroquinolones from water

Authors: Zhao-Hong Hu, Yan-Fei Wang, Ahmed Mohamed Omer, Xiao-kun OuYang

PII: S0141-8130(17)32373-5  
DOI: <http://dx.doi.org/10.1016/j.ijbiomac.2017.09.009>  
Reference: BIOMAC 8181

To appear in: *International Journal of Biological Macromolecules*

Received date: 30-6-2017  
Revised date: 24-8-2017  
Accepted date: 5-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Fabrication of ofloxacin imprinted polymer on the surface of magnetic carboxylated cellulose nanocrystals for highly selective adsorption of fluoroquinolones from water**

**Highlights**

- M-CCNs@MIP was prepared and well-characterized for FQs adsorption.
- M-CCNs@MIP possessed good adsorption properties and reusability.
