Title: The Role of Biopolymer Matrix Films Derived from Carboxymethyl Cellulose, Sodium Alginate and Polyvinyl Alcohol on the Sustained Transdermal Release of Diltiazem

Authors: T.S. Anirudhan, Anoop S. Nair, Gopika SS

PII: S0141-8130(17)31945-1
DOI: <http://dx.doi.org/10.1016/j.ijbiomac.2017.09.053>
Reference: BIOMAC 8230

To appear in: *International Journal of Biological Macromolecules*

Received date: 31-5-2017
Revised date: 7-9-2017
Accepted date: 15-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The Role of Biopolymer Matrix Films Derived from Carboxymethyl
Cellulose, Sodium Alginate and Polyvinyl Alcohol on the Sustained
Transdermal Release of Diltiazem**
