This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE PAGE

Manuscript type: Original Article

Title: Association of serum zinc with markers of liver injury in very heavy drinking alcohol dependent patients.

Short Title: Zinc and alcohol interaction in liver injury

Author List:
