This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Tocotrienol rich fraction supplementation reduces hyperglycemia induced skeletal muscle damage through regulation of insulin signaling and oxidative stress in type 2 diabetic mice

Short title: Role of tocotrienol rich fraction in hyperglycemia induced skeletal muscle damage
