

Accepted Manuscript

Gluten peptides drive healthy and celiac monocytes toward an M2-like polarization

Amelia Barilli, Federica Gaiani, Martina Cirlini, Filippo Ingoglia, Rossana Visigalli, Bianca Maria Rotoli, Nicola de'Angelis, Stefano Sforza, Gian Luigi de'Angelis, Valeria Dall'Asta

PII: S0955-2863(16)30817-8
DOI: doi: [10.1016/j.jnutbio.2017.10.017](https://doi.org/10.1016/j.jnutbio.2017.10.017)
Reference: JNB 7879

To appear in: *The Journal of Nutritional Biochemistry*

Received date: 16 December 2016
Revised date: 20 October 2017
Accepted date: 26 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Gluten peptides drive healthy and celiac monocytes toward an M2-like polarization
