Effects of a human milk oligosaccharide, 2'-fucosyllactose, on hippocampal long-term potentiation and learning capabilities in rodents

Enrique Vázquez, Alejandro Barranco, Maria Ramírez, Agnes Gruart, José M. Delgado-García, Esther Martínez-Lara, Santos Blanco, María Jesús Martín, Esther Castanys, Rachael Buck, Pedro Prieto, Ricardo Rueda

PII: S0955-2863(15)00006-6
DOI: doi: [10.1016/j.jnutbio.2014.11.016](https://doi.org/10.1016/j.jnutbio.2014.11.016)
Reference: JNB 7291

To appear in: *The Journal of Nutritional Biochemistry*

Received date: 23 April 2014
Revised date: 24 November 2014
Accepted date: 25 November 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Total number of pages: 29
Total number of figures: 7
Total number of words in the title: 17
Total number of characters with spaces in the running title: 41
Total number of words in the abstract: 236
Total number of words in the Introduction: 394
Total number of words in the Discussion: 1320

Effects of a human milk oligosaccharide, 2'-fucosyllactose, on hippocampal long-term potentiation and learning capabilities in rodents

Running title: 2'-fucosyllactose improves learning and memory in rodents

The present study was partially supported by Spanish MINECO (BFU2011-29089 and BFU2011-29286) and Junta de Andalucía (BIO122 and CVI7222) grants. This work was also supported by research contracts between Abbott laboratories and the University Pablo de Olavide and the University of Jaen (contract number UJA2583).
