

## Accepted Manuscript

Title: GPER is involved in the functional liaison between breast tumor cells and cancer-associated fibroblasts (CAFs)

Author: Rosamaria Lappano Marcello Maggiolini

PII: S0960-0760(17)30054-7

DOI: <http://dx.doi.org/doi:10.1016/j.jsbmb.2017.02.019>

Reference: SBMB 4899

To appear in: *Journal of Steroid Biochemistry & Molecular Biology*

Received date: 6-7-2016

Revised date: 2-2-2017

Accepted date: 23-2-2017

Please cite this article as: R. Lappano, GPER is involved in the functional liaison between breast tumor cells and cancer-associated fibroblasts (CAFs), *Journal of Steroid Biochemistry and Molecular Biology* (2017), <http://dx.doi.org/10.1016/j.jsbmb.2017.02.019>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- CAFs contribute to the initiation, progression, metastasis and recurrence of breast tumors
- GPER mediates estrogenic signaling in CAFs
- GPER is involved in the functional liaison between breast cancer cells and the surrounding stroma
