

Accepted Manuscript

DNA methylation signatures at endoplasmic reticulum stress genes are associated with adiposity and insulin resistance

Omar Ramos-Lopez, Jose I. Riezu-Boj, Fermin I. Milagro, J. Alfredo Martinez, on behalf of the MENA Project

PII: S1096-7192(17)30607-8
DOI: doi:[10.1016/j.ymgme.2017.11.011](https://doi.org/10.1016/j.ymgme.2017.11.011)
Reference: YMGME 6276

To appear in: *Molecular Genetics and Metabolism*

Received date: 26 September 2017
Revised date: 27 November 2017
Accepted date: 27 November 2017

Please cite this article as: Omar Ramos-Lopez, Jose I. Riezu-Boj, Fermin I. Milagro, J. Alfredo Martinez, on behalf of the MENA Project , DNA methylation signatures at endoplasmic reticulum stress genes are associated with adiposity and insulin resistance. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Ymgme*(2017), doi:[10.1016/j.ymgme.2017.11.011](https://doi.org/10.1016/j.ymgme.2017.11.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

DNA methylation signatures at endoplasmic reticulum stress genes are associated with adiposity and insulin resistance.
