Methods to investigate structure and activation dynamics of GC-1/GC-2

Anne Sömmer, Sönke Behrends

PII: S1089-8603(17)30348-8

DOI: [10.1016/j.niox.2018.04.009](https://doi.org/10.1016/j.niox.2018.04.009)

Reference: YNIOX 1783

To appear in: *Nitric Oxide*

Received Date: 20 December 2017

Revised Date: 19 April 2018

Accepted Date: 23 April 2018

Please cite this article as: A. Sömmer, Sö. Behrends, Methods to investigate structure and activation dynamics of GC-1/GC-2, *Nitric Oxide* (2018), doi: 10.1016/j.niox.2018.04.009.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Methods to investigate structure and activation dynamics of GC-1/GC-2

Anne Sömmers^a, Sönke Behrends^{a*}

^aDepartment of Pharmacology, Toxicology and Clinical Pharmacy
University of Braunschweig - Institute of Technology, Germany

*corresponding author: Mendelssohnstraße 1, 38106 Braunschweig, Germany; Tel.: 49-531-3915604; Fax: 49-531-3918191; E-Mail: s.behrends@tu-braunschweig.de

E-mail addresses: a.soemmer@tu-braunschweig.de (A. Sömmers), s.behrends@tu-braunschweig.de (S. Behrends)

Keywords: guanylyl cyclase; nitric oxide; sGC activator; stopped-flow spectroscopy; Förster-resonance energy transfer; direct fluorescence; analytical ultracentrifugation; chemical cross-linking; small-angle X-ray scattering; electron microscopy; hydrogen-deuterium exchange; protein thermal shift assay
