A sense oligonucleotide to inducible nitric oxide synthase mRNA increases the survival rate of rats in septic shock

Tetsuya Okuyama, Richi Nakatake, Masaki Kaibori, Tadayoshi Okumura, Masanori Kon, Mikio Nishizawa

PII: S1089-8603(17)30218-5

DOI: [10.1016/j.niox.2017.11.003](https://doi.org/10.1016/j.niox.2017.11.003)

Reference: YNIOX 1718

To appear in: *Nitric Oxide*

Received Date: 12 August 2017

Revised Date: 4 October 2017

Accepted Date: 7 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A Sense Oligonucleotide to Inducible Nitric Oxide Synthase mRNA
Increases the Survival Rate of Rats in Septic Shock**
