### Acknowledgment

The laboratory work was supported by Jagiellonian University Grant K/ZDS/005588 and K/ZDS/005619.

### Highlights

Flame atomic absorption spectrometry was used to determine the Zn content in the teeth of the rodents.

PSB-603 and deoxycorticosterone results in an increase in Zn content in the teeth of rodents.

The level of the Zn in the teeth of mice after oxaliplatin administration depended on its dose.

Anti-cancer drugs may interfere with Zn accumulation in the teeth.
