

## Accepted Manuscript

Title: Multi-Gene Co-Expression Can Improve Comprehensive Resistance to Multiple Abiotic Stresses in *Brassica napus* L

Authors: Zaiqing Wang, Cuiling Yang, Hao Chen, Pei Wang, Pengtao Wang, Chunpeng Song, Xiao Zhang, Daojie Wang

PII: S0168-9452(18)30505-3  
DOI: <https://doi.org/10.1016/j.plantsci.2018.06.014>  
Reference: PSL 9883

To appear in: *Plant Science*

Received date: 6-5-2018  
Revised date: 8-6-2018  
Accepted date: 17-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **Highlight**

Co-expression of five genes involved in both ABA-dependent and ABA-independent pathways can rapidly trigger plant stress resistance and synergistically improve the comprehensive resistance to abiotic stress in *B. napus*.
