Title: EET Enhances Renal Function in Obese Mice Resulting in Restoration of Mfn1/2 –HO-1 Signaling, and Decrease in Hypertension through Inhibition of Sodium Chloride Co-Transporter

Authors: Joseph Schragenheim, Lars Bellner, Jian Cao, Shailendra P. Singh, David Bamshad, John A. McClung, Omri Maayan, Aliza Meissner, Ilana Grant, Charles T. Stier Jr., Nader G. Abraham

PII: S1098-8823(17)30163-6
DOI: <https://doi.org/10.1016/j.prostaglandins.2018.05.008>
Reference: PRO 6286

To appear in: *Prostaglandins and Other Lipid Mediators*

Received date: 21-11-2017
Revised date: 12-4-2018
Accepted date: 14-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

EET Enhances Renal Function in Obese Mice Resulting in Restoration of Mfn1/2 –HO-1 Signaling, and Decrease in Hypertension through Inhibition of Sodium Chloride Co-Transporter.
