

## Accepted Manuscript

Membrane Estrogen Receptor Signaling Impacts the Reward Circuitry of the Female Brain to Influence Motivated Behaviors

Katherine R. Tonn Eisinger, Erin B. Larson, Marissa I. Boulware, Mark J. Thomas, Paul G. Mermelstein

PII: S0039-128X(17)30224-6  
DOI: <https://doi.org/10.1016/j.steroids.2017.11.013>  
Reference: STE 8195

To appear in: *Steroids*

Received Date: 29 September 2017  
Revised Date: 20 November 2017  
Accepted Date: 23 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Membrane Estrogen Receptor Signaling Impacts the Reward Circuitry of the Female Brain to  
Influence Motivated Behaviors
