

Accepted Manuscript

Dempster-Shafer theory for combining in silico evidence and estimating uncertainty in chemical risk assessment

James F. Rathman, Chihae Yang, Haojin Zhou

PII: S2468-1113(18)30019-7

DOI: <https://doi.org/10.1016/j.comtox.2018.03.001>

Reference: COMTOX 35

To appear in: *Computational Toxicology*

Received Date: 27 February 2018

Please cite this article as: J.F. Rathman, C. Yang, H. Zhou, Dempster-Shafer theory for combining in silico evidence and estimating uncertainty in chemical risk assessment, *Computational Toxicology* (2018), doi: <https://doi.org/10.1016/j.comtox.2018.03.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dempster-Shafer theory for combining in silico evidence and estimating uncertainty in chemical risk assessment
