Evidence for the involvement of hydraulic root or shoot adjustments as mechanisms underlying water deficit tolerance in two *Sorghum bicolor* genotypes. *Journal of Plant Physiology* <http://dx.doi.org/10.1016/j.jplph.2016.01.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evidence for the involvement of hydraulic root or shoot adjustments as mechanisms underlying water deficit tolerance in two *Sorghum bicolor* genotypes
