This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mitochondrial adaptation in steatotic mice

Claudia Einer^{1*}, Simon Hohenester^{2*}, Ralf Wimmer², Lena Wottke², Renate Artmann², Sabine Schulz¹, Christian Gosmann¹, Alisha Simmons¹, Christin Leitzinger¹, Carola Eberhagen¹, Sabine Borchard¹, Sabine Schmitt³, Stefanie M. Hauck⁴, Christine von Toerne⁴, Martin Jastroch⁵, Ellen Walheim⁵, Christian Rust⁶, Alexander L. Gerbes², Bastian Popper⁷, Doris Mayr⁸, Max Schnurr⁹, Angelika M. Vollmar¹⁰, Gerald Denk^{2**}, and Hans Zischka^{1,3**}

* both authors share first authorship. ** both authors share last authorship.

Keywords: NAFLD; steatosis; mitochondria; Western diet.

Conflict of interest statement: The authors have declared that no conflict of interest exists.

Financial support statement: This study was supported by the Deutsche Forschungsgemeinschaft (DFG) grant RU742/6-1 to HZ and CR and by the Faculty of Medicine of the University Munich (LMU), startup grant (FöFoLe #905) to SH.

Authors' contributions : CE and SH designed and performed experiments, analyzed data and wrote the paper. RW, LW, RA, SSchu, CG, AS, CL, CEb, SB, SSchm, CvT, EW performed experiments. BP, DM did histochemical and TEM analyses. SMH, MJ, CR, ALG, MS, AMV analyzed data. GD and HZ designed experiments, analyzed data, wrote the paper and directed this study.
