

Accepted Manuscript

Genome stability of programmed stem cell products

Ulrich Martin

PII: S0169-409X(17)30185-0
DOI: doi:[10.1016/j.addr.2017.09.004](https://doi.org/10.1016/j.addr.2017.09.004)
Reference: ADR 13174

To appear in: *Advanced Drug Delivery Reviews*

Received date: 22 May 2017
Revised date: 31 August 2017
Accepted date: 7 September 2017

Please cite this article as: Ulrich Martin, Genome stability of programmed stem cell products, *Advanced Drug Delivery Reviews* (2017), doi:[10.1016/j.addr.2017.09.004](https://doi.org/10.1016/j.addr.2017.09.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Invited Review:

Genome stability of programmed stem cell products
