

## Accepted Manuscript

Title: Correlation between ubiquitination and defects of bull spermatozoa and removal of defective spermatozoa using anti-ubiquitin antibody-coated magnetized beads

Authors: Jian Zhang, Jie Su, Shuxiang Hu, Jindun Zhang, Rui Ding, Jitong Guo, Guifang Cao, Rongfeng Li, Qing-Yuan Sun, Xihe Li

PII: S0378-4320(17)30949-1  
DOI: <https://doi.org/10.1016/j.anireprosci.2018.01.018>  
Reference: ANIREP 5764

To appear in: *Animal Reproduction Science*

Received date: 28-11-2017  
Revised date: 4-1-2018  
Accepted date: 26-1-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Correlation between ubiquitination and defects of bull spermatozoa and removal of defective spermatozoa using anti-ubiquitin antibody-coated magnetized beads**

**ABSTRACT**

Ubiquitination is an important cellular process in spermatogenesis and involves the regulation
