

## Author's Accepted Manuscript

Rapid production of extracellular thermostable alkaline halophilic protease originating from an extreme haloarchaeon, *Halobacterium salinarum* by *Bacillus subtilis*

Ruangurai Promchai, Auttaporn Boonchalearn,  
Wonnop Visessanguan, Plearnpis Luxananil

PII: S1878-8181(18)30299-8  
DOI: <https://doi.org/10.1016/j.bcab.2018.06.017>  
Reference: BCAB790

To appear in: *Biocatalysis and Agricultural Biotechnology*

Received date: 18 April 2018

Accepted date: 21 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
