This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original manuscript

Yellow means correction or addition

Red with slashed means deletion

Characterization and application of fungal chlorogenate hydrolase to enzymatic
breaking down of chlorogenate from yerba mate
