

## Accepted Manuscript

Title: Peptides from legumes with antigastrointestinal cancer potential: current evidence for their molecular mechanisms

Author: Diego Luna-Vital Elvira González de Mejía

PII: S2214-7993(17)30084-X  
DOI: <https://doi.org/doi:10.1016/j.cofs.2018.02.012>  
Reference: COFS 339

To appear in:

Received date: 21-12-2017  
Revised date: 22-2-2018  
Accepted date: 23-2-2018

Please cite this article as: Luna-Vital, D., Mejía, E.G., Peptides from legumes with antigastrointestinal cancer potential: current evidence for their molecular mechanisms, *COFS* (2018), <https://doi.org/10.1016/j.cofs.2018.02.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Peptides from legumes with antigastrointestinal cancer potential: current**  
2 **evidence for their molecular mechanisms**
