Please cite this article as: Pinho, Sónia, Macedo, Maria H., Rebelo, Catarina, Sarmento, Bruno, Ferreira, Lino, Stem cells as vehicles and targets of nanoparticles. Drug Discovery Today <https://doi.org/10.1016/j.drudis.2018.01.030>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Stem cells as vehicles and targets of nanoparticles

Teaser: Stem cell targeting is important in the context of regenerative and therapeutic medicine. Nanoparticles alone or within stem cells offer a platform to target the stem cell niche.

Highlights:

- Nanoparticle formulations for endogenous stem cell targeting
