A novel biodegradable film from edible mushroom (*F. velutipes*)
by product: Microstructure, mechanical and barrier properties
associated with the fiber morphology

Wenhang Wang, Kai Zhang, Cong Li, Shan Cheng, Jingyang
Zhou, Zinan Wu

PII: S1466-8564(17)30694-X

DOI: <https://doi.org/10.1016/j.ifset.2018.02.004>

Reference: INNFOO 1924

To appear in: *Innovative Food Science and Emerging Technologies*

Received date: 22 June 2017

Revised date: 22 November 2017

Accepted date: 5 February 2018

Please cite this article as: Wenhang Wang, Kai Zhang, Cong Li, Shan Cheng, Jingyang Zhou, Zinan Wu , A novel biodegradable film from edible mushroom (*F. velutipes*) by product: Microstructure, mechanical and barrier properties associated with the fiber morphology. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Innfoo(2017), <https://doi.org/10.1016/j.ifset.2018.02.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
