Inactivation of *Aspergillus carbonarius* and *Aspergillus flavus* in malting barley by pulsed light and impact on germination capacity and microstructure

María Helga Zenklusen, María Bernarda Coronel, María Águeda Castro, Stella Maris Alzamora, Héctor Horacio Lucas González

PII: S1466-8564(17)30502-7
DOI: doi: [10.1016/j.ifset.2017.09.003](https://doi.org/10.1016/j.ifset.2017.09.003)
Reference: INNFOO 1841

To appear in: *Innovative Food Science and Emerging Technologies*

Received date: 5 May 2017
Revised date: 26 July 2017
Accepted date: 11 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Inactivation of *Aspergillus carbonarius* and *Aspergillus flavus* in malting barley by pulsed light and impact on germination capacity and microstructure
