Pulsed electric fields as a green technology for the extraction of bioactive compounds from thinned peach by-products

Diego Redondo, María E. Venturini, Elisa Luengo, Javier Raso, Esther Arias

PII: S1466-8564(17)31113-X
DOI: <https://doi.org/10.1016/j.ifset.2017.12.004>
Reference: INNFOO 1900

To appear in: *Innovative Food Science and Emerging Technologies*

Received date: 29 September 2017
Revised date: 12 December 2017
Accepted date: 13 December 2017

Please cite this article as: Diego Redondo, María E. Venturini, Elisa Luengo, Javier Raso, Esther Arias , Pulsed electric fields as a green technology for the extraction of bioactive compounds from thinned peach by-products. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Innfoo(2017), <https://doi.org/10.1016/j.ifset.2017.12.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
