

## Accepted Manuscript

Development of a high-throughput bead based assay system to measure HIV-1 specific immune signatures in clinical samples

Thomas Liechti, Claus Kadelka, Hanna Ebner, Nikolas Friedrich, Roger D. Kouyos, Huldrych F. Günthard, Alexandra Trkola

PII: S0022-1759(17)30423-4  
DOI: <https://doi.org/10.1016/j.jim.2017.12.003>  
Reference: JIM 12394

To appear in: *Journal of Immunological Methods*

Received date: 28 September 2017  
Revised date: 13 November 2017  
Accepted date: 18 December 2017

Please cite this article as: Thomas Liechti, Claus Kadelka, Hanna Ebner, Nikolas Friedrich, Roger D. Kouyos, Huldrych F. Günthard, Alexandra Trkola, Development of a high-throughput bead based assay system to measure HIV-1 specific immune signatures in clinical samples. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Jim*(2017), <https://doi.org/10.1016/j.jim.2017.12.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Development of a high-throughput bead based assay system to measure HIV-1 specific immune signatures in clinical samples

Thomas Liechti<sup>1#†</sup>, Claus Kadelka<sup>1,2†</sup>, Hanna Ebner<sup>1†</sup>, Nikolas Friedrich<sup>1</sup>, Roger D. Kouyos<sup>1,2</sup>, Huldrych F. Günthard<sup>1,2</sup>, Alexandra Trkola<sup>1\*</sup>
