

Accepted Manuscript

DNA cytosine hydroxymethylation levels are distinct among non-overlapping classes of peripheral blood leukocytes

Natalie M. Hohos, Kevin Lee, Lexiang Ji, Miao Yu, Muthugapatti M. Kandasamy, Bradley G. Phillips, Clifton A. Baile, Chuan He, Robert J. Schmitz, Richard B. Meagher

PII: S0022-1759(16)30094-1
DOI: doi: [10.1016/j.jim.2016.05.003](https://doi.org/10.1016/j.jim.2016.05.003)
Reference: JIM 12182

To appear in: *Journal of Immunological Methods*

Received date: 17 February 2016
Revised date: 19 April 2016
Accepted date: 2 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

DNA cytosine hydroxymethylation levels are distinct among non-overlapping classes of peripheral blood leukocytes
