

Accepted Manuscript

Improving the selection efficiency of the counter-selection marker pheS* for the genetic engineering of *Bacillus amyloliquefaciens*

Maria S. Kharchenko, Petr N. Teslya, Maria N. Babaeva, Natalia P. Zakataeva

PII: S0167-7012(18)30155-6
DOI: doi:[10.1016/j.mimet.2018.03.011](https://doi.org/10.1016/j.mimet.2018.03.011)
Reference: MIMET 5353
To appear in: *Journal of Microbiological Methods*
Received date: 1 March 2018
Accepted date: 22 March 2018

Please cite this article as: Maria S. Kharchenko, Petr N. Teslya, Maria N. Babaeva, Natalia P. Zakataeva , Improving the selection efficiency of the counter-selection marker pheS* for the genetic engineering of *Bacillus amyloliquefaciens*. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Mimet(2018), doi:[10.1016/j.mimet.2018.03.011](https://doi.org/10.1016/j.mimet.2018.03.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Improving the selection efficiency of the counter-selection marker *pheS for the genetic engineering of *Bacillus amyloliquefaciens***
