Influence of polygamous versus monogamous mating on embryo production in four different strains of mice after superovulatory treatment

Malte Heykants, Hagen Scherb, Geert Michel, Esther Mahabir

PII: S0093-691X(18)30107-9

DOI: [10.1016/j.theriogenology.2018.03.023](https://doi.org/10.1016/j.theriogenology.2018.03.023)

Reference: THE 14485

To appear in: *Theriogenology*

Received Date: 13 December 2017

Revised Date: 11 March 2018

Accepted Date: 16 March 2018

Short title: Mating and embryo production

Summary sentence: Polygamous mating can be practised for embryo production in mice

Keywords: superovulation, embryo production, assisted reproductive technologies,
monogamous mating, polygamous mating
