Vitamin B3 forms as precursors to NAD⁺: are they safe?

Poljsak B, Milisav I

PII: S0924-2244(17)30355-2

DOI: [10.1016/j.tifs.2018.07.020](https://doi.org/10.1016/j.tifs.2018.07.020)

Reference: TIFS 2281

To appear in: *Trends in Food Science & Technology*

Received Date: 11 June 2017

Revised Date: 15 May 2018

Accepted Date: 12 July 2018

Please cite this article as: B, P., I, M., Vitamin B3 forms as precursors to NAD⁺: are they safe?, *Trends in Food Science & Technology* (2018), doi: 10.1016/j.tifs.2018.07.020.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Vitamin B3 forms as precursors to NAD⁺: are they safe?

Poljsak B¹ and Milisav I^{1,2*}
