Cold atmospheric pressure plasma and low energy electron beam as alternative nonthermal decontamination technologies for dry food surfaces: A review

Christian Hertwig, Nicolas Meneses, Alexander Mathys

PII: S0924-2244(17)30657-X

DOI: [10.1016/j.tifs.2018.05.011](https://doi.org/10.1016/j.tifs.2018.05.011)

Reference: TIFS 2225

To appear in: *Trends in Food Science & Technology*

Received Date: 11 October 2017

Revised Date: 4 May 2018

Accepted Date: 5 May 2018

Please cite this article as: Hertwig, C., Meneses, N., Mathys, A., Cold atmospheric pressure plasma and low energy electron beam as alternative nonthermal decontamination technologies for dry food surfaces: A review, *Trends in Food Science & Technology* (2018), doi: 10.1016/j.tifs.2018.05.011.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Cold atmospheric pressure plasma and low energy electron beam**  
2 **as alternative nonthermal decontamination technologies for dry**  
3 **food surfaces: A review**
