Strategies for the discovery and identification of food protein-derived biologically active peptides

Alice B. Nongonierma, Richard J. FitzGerald

PII: S0924-2244(16)30445-9

DOI: [10.1016/j.tifs.2017.03.003](https://doi.org/10.1016/j.tifs.2017.03.003)

Reference: TIFS 1978

To appear in: *Trends in Food Science & Technology*

Received Date: 6 October 2016

Revised Date: 6 February 2017

Accepted Date: 10 March 2017

Please cite this article as: Nongonierma, A.B., FitzGerald, R.J., Strategies for the discovery and identification of food protein-derived biologically active peptides, *Trends in Food Science & Technology* (2017), doi: 10.1016/j.tifs.2017.03.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Strategies for the discovery and identification of food protein-derived
biologically active peptides**
