Title: Autologous/Allogeneic Hematopoietic Cell Transplantation (HCT) Versus Tandem Autologous Transplantation for Multiple Myeloma – Comparison of Long Term Post Relapse Survival

Author: Myo Htut, Anita D'Souza, Amrita Krishnan, Benedetto Bruno, Mei-Jie Zhang, Mingwei Fei, Miguel Angel Diaz, Edward Copelan, Siddhartha Ganguly, Mehdi Hamadani, Mohamed Kharfan-Dabaja, Hillard Lazarus, Cindy Lee, Kenneth Meehan, Taiga Nishihori, Ayman Saad, Sachiko Seo, Muthalagu Ramanathan, Saad Z. Usmani, Christina Gasparetto, Tomer M. Mark, Yago Nieto, Parameswaran Hari

PII: S1083-8791(17)30793-0  
DOI: <https://doi.org/doi:10.1016/j.bbmt.2017.10.024>  
Reference: YBBMT 54838

To appear in: *Biology of Blood and Marrow Transplantation*

Received date: 27-6-2017  
Accepted date: 12-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Autologous/allogeneic hematopoietic cell transplantation (HCT) versus tandem autologous transplantation for multiple myeloma – Comparison of long term post relapse survival**
