The hypoxic tumor microenvironment *in vivo* selects the tumor cells with increased survival against genotoxic stresses

Hoon Kim, Qun Lin, Zhong Yun

PII: S0304-3835(18)30386-0

DOI: [10.1016/j.canlet.2018.05.047](https://doi.org/10.1016/j.canlet.2018.05.047)

Reference: CAN 13931

To appear in: *Cancer Letters*

Received Date: 9 March 2018

Revised Date: 24 May 2018

Accepted Date: 25 May 2018

Please cite this article as: H. Kim, Q. Lin, Z. Yun, The hypoxic tumor microenvironment *in vivo* selects the tumor cells with increased survival against genotoxic stresses, *Cancer Letters* (2018), doi: 10.1016/j.canlet.2018.05.047.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The hypoxic tumor microenvironment *in vivo* selects the tumor cells with increased survival against genotoxic stresses.

Hoon Kim, Qun Lin, and Zhong Yun

Department of Therapeutic Radiology, Yale School of Medicine, New Haven, CT 06510, USA

Total Word Counts: 5,100 (excluding title page, references, and figure legends)

Running title: Radioresistance of naturally occurring hypoxic tumor cells

Keywords: Checkpoint kinases, DNA Damage Response, Hypoxia, Tumor Microenvironment, Xenograft
