This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Squalene epoxidase as a promising metabolic target in cancer treatment

Authors: Cirmena Gabriella^{*,1}, Franceschelli Paola^{*,1}, Isnaldi Edoardo¹, Ferrando Lorenzo¹, De Mariano Marilena¹, Ballestrero Alberto^{1,2,#}, Zoppoli Gabriele^{1,2,§}

Affiliations:

¹Department of Internal Medicine, University of Genoa, IT

²Ospedale Policlinico San Martino, Genoa, IT

Correspondence:

[§]To Whom correspondence should be addressed: Prof. Gabriele Zoppoli M.D., Ph.D., Primo Piano Retrocorpo DiMI, Viale Benedetto XV, 6, 16132 Genoa, IT – gabriele.zoppoli@unige.it

[#]To Whom correspondence may also be addressed: Prof. Alberto Ballestrero, M.D., Ph.D., Primo Piano Retrocorpo DiMI, Viale Benedetto XV, 6, 16132 Genoa, IT -

^{*}These Authors equally contributed to the present manuscript

Running title: SE as a promising metabolic target in cancer treatment

Keywords: Squalene epoxidase, cancer treatment, metabolism, cell proliferation and migration, cholesterol synthesis
