

# Accepted Manuscript

Targeted co-delivery of epirubicin and NAS-24 aptamer to cancer cells using selenium nanoparticles for enhancing tumor response *in vitro* and *in vivo*

Seyed Hamid Jalalian, Mohammad Ramezani, Khalil Abnous, Seyed Mohammad Taghdisi

PII: S0304-3835(17)30795-4

DOI: [10.1016/j.canlet.2017.12.023](https://doi.org/10.1016/j.canlet.2017.12.023)

Reference: CAN 13654

To appear in: *Cancer Letters*

Received Date: 1 November 2017

Revised Date: 14 December 2017

Accepted Date: 14 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Targeted co-delivery of epirubicin and NAS-24 aptamer to cancer cells using**  
2 **selenium nanoparticles for enhancing tumor response *in vitro* and *in vivo***
