Transcriptome analysis identifies genes involved in sex determination and development of *Xenopus laevis* gonads

Rafal P. Piprek, Milena Damulewicz, Malgorzata Kloc, Jacek Z. Kubiak

PII: S0301-4681(17)30173-1
DOI: <https://doi.org/10.1016/j.diff.2018.02.004>
Reference: DIFF528

To appear in: *Differentiation*

Received date: 29 December 2017
Revised date: 19 February 2018
Accepted date: 23 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Transcriptome analysis identifies genes involved in sex determination and development of *Xenopus laevis* gonads
