

## Accepted Manuscript

Predominant Asymmetrical Stem Cell Fate Outcome Limits the Rate of Niche Succession in Human Colonic Crypts

Craig Stamp, Anze Zupanic, Ashwin Sachdeva, Elizabeth A. Stoll, Daryl P. Shanley, John C. Mathers, Thomas B.L. Kirkwood, Rakesh Heer, Benjamin D. Simons, Doug M. Turnbull, Laura C. Greaves

PII: S2352-3964(18)30145-2  
DOI: doi:[10.1016/j.ebiom.2018.04.017](https://doi.org/10.1016/j.ebiom.2018.04.017)  
Reference: EBIOM 1431  
To appear in: *EBioMedicine*  
Received date: 12 December 2017  
Revised date: 20 March 2018  
Accepted date: 19 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Predominant asymmetrical stem cell fate outcome limits the rate of niche succession in human colonic crypts
