

Author's Accepted Manuscript

Functional Role for Stable Microtubules in Lens
Fiber Cell Elongation

Caitlin M. Logan, Caitlin J. Bowen, A. Sue Menko

PII: S0014-4827(17)30666-3
DOI: <https://doi.org/10.1016/j.yexcr.2017.12.012>
Reference: YEXCR10851

To appear in: *Experimental Cell Research*

Received date: 27 July 2017
Revised date: 17 November 2017
Accepted date: 13 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Functional Role for Stable Microtubules in Lens Fiber Cell Elongation

Caitlin M. Logan, Caitlin J. Bowen, A. Sue Menko*

Department of Pathology, Anatomy and Cell Biology, Thomas Jefferson University,
Philadelphia, Pennsylvania 19107

Running title: *Stable microtubules and lens fiber cell elongation*

*Corresponding author: Prof. A. Sue Menko, Department of Pathology, Anatomy and Cell Biology, Thomas Jefferson University, Rm 564 Jefferson Alumni Hall, 1020 Locust St, Philadelphia, Pennsylvania 19107; Telephone: 215-503-7845; Email: sue.menko@jefferson.edu

Full address for all authors is same as above. Additional contact information:
