This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

S. Sakashita et al.

**Case report of three EGFR TKI naïve lung adenocarcinoma containing double EGFR mutations (L858R/T790M or Exon 19 Deletion/T790M) ; Comparing genetic information and histology.**

Short running title : Heterogeneity of T790M in TKI naïve adenocarcinoma

Shingo Sakashita<sup>1)</sup>, Aya Shiba-Ishii<sup>1)</sup>, Yoshihiko Murata<sup>2)</sup>, Ryutaro Sekimoto<sup>3)</sup>, Yuko Minami<sup>4)</sup>, Yukio Sato<sup>5)</sup> and Masayuki Noguchi<sup>1)</sup>
