Title: *Carthamus Tinctorius* L. extract improves hemodynamic and vascular alterations in a rat model of renovascular hypertension through Ang II-AT₁R-NADPH oxidase pathway

Authors: Sarawoot Bunbupha, Chutamas Wunpathe, Putcharawipa Maneesai, Thewarid Berkban, Upa Kukongviriyapan, Veerapol Kukongviriyapan, Parichat Prachaney, Poungrat Pakdeechote

PII: S0940-9602(17)30151-6
DOI: <https://doi.org/10.1016/j.aanat.2017.11.005>
Reference: AANAT 51204

To appear in:

Received date: 29-7-2017
Revised date: 20-11-2017
Accepted date: 21-11-2017

Please cite this article as: Bunbupha, Sarawoot, Wunpathe, Chutamas, Maneesai, Putcharawipa, Berkban, Thewarid, Kukongviriyapan, Upa, Kukongviriyapan, Veerapol, Prachaney, Parichat, Pakdeechote, Poungrat, *Carthamus Tinctorius* L.extract improves hemodynamic and vascular alterations in a rat model of renovascular hypertension through Ang II-AT₁R-NADPH oxidase pathway. *Annals of Anatomy* <https://doi.org/10.1016/j.aanat.2017.11.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Carthamus Tinctorius* L. extract improves hemodynamic and vascular alterations in a rat model of renovascular hypertension through Ang II-AT₁R-NADPH oxidase pathway**
