Title: Structural study of skeletal muscle fibres in healthy and pseudomyotonia affected cattle

Author: Francesco Mascarello Roberta Sacchetto

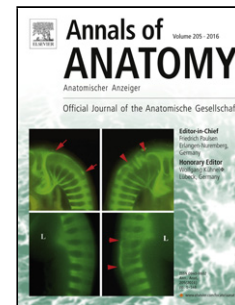

PII: S0940-9602(16)30091-7
DOI: <http://dx.doi.org/doi:10.1016/j.aanat.2016.05.002>
Reference: AANAT 51044

To appear in:

Received date: 18-11-2015
Revised date: 4-5-2016
Accepted date: 6-5-2016

Please cite this article as: Mascarello, F., Sacchetto, R., Structural study of skeletal muscle fibres in healthy and pseudomyotonia affected cattle, *Annals of Anatomy* (2016), <http://dx.doi.org/10.1016/j.aanat.2016.05.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Structural study of skeletal muscle fibres in healthy and pseudomyotonia affected cattle

Francesco Mascarello^a, Roberta Sacchetto^{a,*}
