Title: How Cellular Zn²⁺ Signaling Drives Physiological Functions

Authors: Noam Levaot, Michal Hershfinkel

PII: S0143-4160(18)30116-7
DOI: <https://doi.org/10.1016/j.ceca.2018.08.004>
Reference: YCECA 1971

To appear in: *Cell Calcium*

Received date: 25-6-2018
Revised date: 16-8-2018
Accepted date: 17-8-2018

Please cite this article as: Levaot N, Hershfinkel M, How Cellular Zn²⁺ Signaling Drives Physiological Functions, *Cell Calcium* (2018), <https://doi.org/10.1016/j.ceca.2018.08.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

How Cellular Zn^{2+} Signaling Drives Physiological Functions

Noam Levaot and Michal Hershinkel
