Title: Lamellipodial tension, not integrin/ligand binding, is the crucial factor to realise integrin activation and migration

Author: Carsten Schulte PhD Gian Maria Sarra Ferraris
Amanda Oldani Massimiliano Galluzzi Alessandro Podestà
Luca Puricelli Valentina de Lorenzi Cristina Lenardi Paolo
Milani Nicolai Sidenius

PII: S0171-9335(15)30012-1
DOI: <http://dx.doi.org/doi:10.1016/j.ejcb.2015.10.002>
Reference: EJCB 50853

To appear in:

Received date: 18-5-2015
Revised date: 5-10-2015
Accepted date: 13-10-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Lamellipodial tension, not integrin/ligand binding, is the crucial factor to realise integrin activation and migration
