MicroRNA-101a suppresses fibrotic programming in isolated cardiac fibroblasts and in vivo fibrosis following trans-aortic constriction

Yue Zhou, Thiam Chien Shiok, Arthur Mark Richards, Peipei Wang

PII: S0022-2828(18)30697-7

DOI: doi:[10.1016/j.yjmcc.2018.07.251](https://doi.org/10.1016/j.yjmcc.2018.07.251)

Reference: YJMCC 8776

To appear in: *Journal of Molecular and Cellular Cardiology*

Received date: 26 March 2018

Revised date: 19 June 2018

Accepted date: 23 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

MicroRNA-101a suppresses fibrotic programming in isolated cardiac fibroblasts and *in vivo* fibrosis
following trans-aortic constriction
