Modelling the pathogenesis of Myotonic Dystrophy type 1 cardiac phenotype through human iPSC-derived cardiomyocytes

Paola Spitalieri, Rosa V. Talarico, Silvia Caioli, Michela Murdocca, Annalucia Serafino, Marco Girasole, Simone Dinarelli, Giovanni Longo, Sabina Pucci, Annalisa Botta, Giuseppe Novelli, Cristina Zona, Ruggiero Mango, Federica Sangiuolo

PII: S0022-2828(18)30083-X
DOI: doi:[10.1016/j.yjmcc.2018.03.012](https://doi.org/10.1016/j.yjmcc.2018.03.012)
Reference: YJMCC 8703

To appear in: *Journal of Molecular and Cellular Cardiology*

Received date: 22 January 2018
Revised date: 12 March 2018
Accepted date: 14 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modelling the pathogenesis of Myotonic Dystrophy type 1 cardiac phenotype through human iPSC-derived cardiomyocytes
