Activation of the Na⁺/H⁺ exchanger in isolated cardiomyocytes through β -Raf dependent pathways. Role of Thr⁶⁵³ of the cytosolic tail

Xiuju Li, Aruna Augustine, Difei Sun, Liang Li, Larry Fliegel

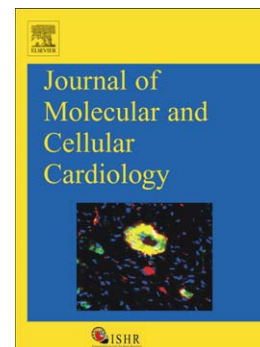

PII: S0022-2828(16)30314-5
DOI: doi: [10.1016/j.yjmcc.2016.08.014](https://doi.org/10.1016/j.yjmcc.2016.08.014)
Reference: YJMCC 8440

To appear in: *Journal of Molecular and Cellular Cardiology*

Received date: 8 April 2016
Revised date: 4 August 2016
Accepted date: 19 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Activation of the Na⁺/H⁺ Exchanger in Isolated Cardiomyocytes Through β -Raf Dependent Pathways.
Role of Thr⁶⁵³ of the Cytosolic Tail
