

## Accepted Manuscript

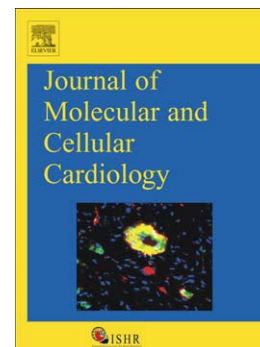

Thin filament length in the cardiac sarcomere varies with sarcomere length but is independent of titin and nebulin

Justin Kolb, Frank Li, Mei Methawasin, Maya Adler, Yael-Natalie Escobar, Joshua Nedrud, Christopher T. Pappas, Samantha P. Harris, Henk Granzier

PII: S0022-2828(16)30079-7  
DOI: doi: [10.1016/j.yjmcc.2016.04.013](https://doi.org/10.1016/j.yjmcc.2016.04.013)  
Reference: YJMCC 8380

To appear in: *Journal of Molecular and Cellular Cardiology*

Received date: 24 December 2015  
Revised date: 11 April 2016  
Accepted date: 22 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Thin filament length in the cardiac sarcomere varies with sarcomere length but is independent of titin and nebulin.**
